Game Controls—Controller Setting

Your Nintendo® 64 controller is fully customizable, and you may alter the default settings to fit your own personal style. Also note that if you want to, you may assign a function such as Ducking to an entirely separate button.

So—What Do They Do?

Here's what the Nintendo 64's controller buttons actually control.

Control Stick: Taunt your opponent. Appeal to the crowd. Special Attack (+ Grapple, Long, when your Spirit Meter flashes "Special!").

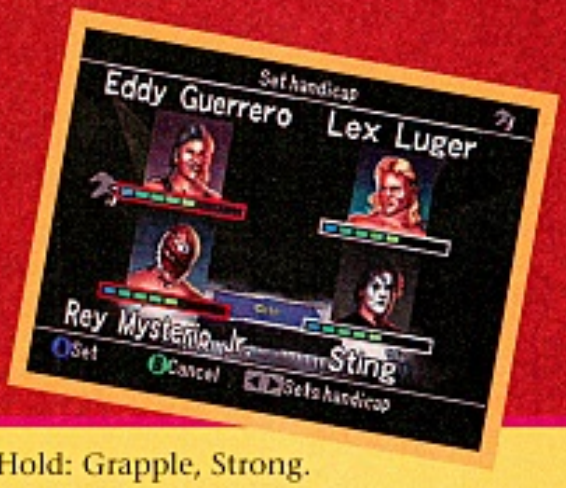
Control Pad: Move your wrestler around the ring.

Start: Pauses the game.

C Button Down (▼): Run in the direction you're facing. Go for the pin when your opponent is on the mat.

C Button Left/Right (◄ ►): Change your wrestler's costume when you're selecting a wrestler.

A Button, Tap Ⓐ: Grapple, Weak. Accept and advance in the menu screens.



A Button, Press and Hold: Grapple, Strong.

B Button, Tap Ⓑ: Attack, Weak. Hit your opponent with a foreign object. Cancel and return to the previous menu screen.

B Button, Press and Hold Ⓑ: Attack, Strong.

L Button (Ⓛ): Avoid a grapple. Change the wrestling organization when you're selecting a wrestler.

C Button Up (▲): Flip a fallen or standing opponent. Snatch a foreign object from the crowd when you're outside the ring. Climb up out of the ring (+ D Pad).

C Button Right (▶): Switch your wrestler's attention to a different opponent in Battle Royale, Handicap, and Tag Team modes.

C Button Down (▼): Climb up onto the turnbuckle (+ D Pad). Run.

R Button (Ⓡ): Block. Reverse. Change the wrestling organization when you're selecting a wrestler.

Game Controls—Audio Setting

Alter the Audio settings to your liking. You may choose from mono or stereo, and set sound levels for the background music and sound effects.

Game Controls—Option

You may change a number of options to suit your playing style and skill level.

Difficulty: Easy, Normal, or Hard.

Spirit Meter: Reflects the level of adrenaline and emotion the wrestler fights with. When the Spirit Meter is full, and begins

to flash "Special!," the wrestler may execute his Special Move or Blow.

Realism: If you select Realism On, the wrestlers will display the injuries they've accumulated over the course of the match.

The Basics—Moves and Holds

A nice feature of *WCW vs. NWO: World Tour* is that there are no insanely complicated, impossible-to-execute button combos to memorize. Each wrestler fights using the same basic button combinations, with very few exceptions (not all wrestlers have all types of moves).

In other words, even though the move or the hold your wrestler *actually* pulls off varies widely from wrestler to wrestler (depending on that wrestler's fighting style), the *type* of move or hold it is, and the button combination for executing it, remain the same for all 43 wrestlers, including the six bosses.

You determine how strong each attack or grapple will be—Weak or Strong—by the length of time you press and hold the Ⓑ or Ⓐ buttons, respectively. Within each *type* of attack or grapple, there are four different moves, depending on not only the length of time you press the button (obviously), but on your distance from your opponent.

Making It Happen

Part Two, "The Wrestlers," contains the complete list of moves and holds for each wrestler. The appendix, "The Bosses," reveals all the button commands for *WCW vs. NWO: World Tour*'s hidden characters. Here are a few basics:

- Grapple, Weak: Tap the Ⓐ button.
- Grapple, Strong: Press and hold the Ⓐ button.
- Post: While your opponent is on the mat, move to the nearest turnbuckle and press the Ⓑ button. Note: Opponent might have to be square with mat for signature move.
- Post: While your opponent is standing, move to the nearest turnbuckle and press the Ⓑ button.

- Rope Dive: Run toward the ropes you're facing by pressing the ▼ button. On the rebound, press and hold the Ⓐ button.
- Turnbuckle Jump: Move to the nearest turnbuckle and press the ▼ button.

Basic Game Power: Holds

Your wrestler has several holds that will differ depending on how near or far you are from your opponent, and how long you press the Ⓐ button. If you grapple your opponent from far away and press the Ⓐ button for a short time, you'll execute a "weak" hold, such as a Punch to Face. If you grapple your opponent from up close and press the Ⓐ button for a long time, you execute a "strong" hold, such as a Power Lift Body Slam.

Winning is all about timing. One way to practice timing your moves is to plug a second controller into your Nintendo 64, and set Player Two for human control (not the CPU). The second wrestler will just stand there, letting you pummel him mercilessly, while you perfect your technique and your timing.

Basic Game Power: Blows

Your wrestler has several blows that will vary depending on how close or distant you are from your opponent, and how long you hold down the Ⓑ button. If you attack your opponent from a distance and tap the Ⓑ button quickly, you execute a "weak" punching attack, such as a Slap Chest. Attack your opponent from nearby and hold the Ⓑ button for a long time, and you execute a "strong" kicking attack, such as a Knee Kick.

If you've dropped your opponent to the mat, you can then execute either a Blow Attack or a Joint Attack. Blow Attacks are moves such as elbow drops, standing flips, stomps, and so on. Joint Attacks are striking moves and submission holds. For example, if you're standing over your opponent's legs and you press the Ⓐ button, you might pull off a Camel Clutch. If you're standing over your opponent's legs and you press the Ⓐ button, you might also pull off a Groin Sever Spread.

Watch your opponent's Spirit Meter very closely. As you pummel your opponent, or wrap him up in a Submission Hold, his Spirit will decrease. When his Spirit is almost gone, or you see his Spirit Meter flash the "Danger!" message, you can put him away once and for all!

Basic Game Power: Counters

If your opponent rushes you with a punching or kicking attack, your wrestler has a counter that you execute by pressing the Ⓡ button. Counter a punch with a move such as the One Arm Flip, or a kick with a move like the Standing Achilles. For added power, press the Ⓡ button and then the Ⓑ button for a counter with an extra attack.

Overpower an opponent's attack with the right move. A block move will overpower a punch or kick, a punching or kicking move will overpower a hold, and a hold move will overpower a block.

Basic Game Power: Special!

Each wrestler has a Special Blow that can't be countered. When you see your Spirit Meter flash the "Special!" message, you can execute your Special Blow by pressing and holding the Ⓐ button, and moving the Control Stick in any direction.

Even though your Special Blow can't be overpowered, don't use it too often or your opponent will know it's coming, and he'll be ready and waiting.

A Look Ahead

There are so many ways to play *WCW vs. NWO: World Tour,* you could spend literally months experiencing them all. To whet your appetite, here's a look ahead.

WCW vs. NWO

This is where the big boys of wrestling (World Championship Wrestling) go head-to-head with the bad boys of wrestling (New World Order).

WCW

Pick your team from the cream of WCW pro wrestling crop.

NWO

Coming on strong, NWO refuses to take a back seat to WCW. The wrestlers of NWO are here to stay—and they mean business!

Exhibition Match

Are you ready to rumble? Then prove you've got the draw: It's go time! Exhibition Match offers you a large variety of gameplay options to choose from.

1 vs. 1 Single

What could be better than a little one-on-one to settle a score, teach a heel a lesson, or find out who's bad? 1 vs. 1 Single is a good way to go when you've got something to prove.

2 vs. 2 Tag

There's no better feeling than to hand some punk his head—except when a good buddy's by your side to laugh along with you! Some of the most exciting cards in wrestling consist of tag team dances.

1 vs. 2 Handicap

Are you the baddest wrestler this side of the Pacific? Are you the stiffest[20] worker[21] north of the border? Prove it! See how tough you are when you're wrestling all by yourself—against *two* opponents!

[20] Contact that causes injury, although usually not serious.

[21] A good wrestler who has a good workrate (the percentage of his good wrestling blows and holds to his bad or dull moves). Not to be confused with "work," which is fakery.

Battle Royale

Sometimes a little free-for-all grudge match is pro wrestling the way it ought to be—last man standing wins! Nothing could be more satisfying than that—as long as you're the last man!

League Challenge

Always a favorite event, League Challenge is the meat-and-potatoes of pro wrestling. If you defeat every wrestler in an individual organization, including your own, you'll face the hidden boss of that organization. Once you beat the boss, that wrestler may be saved to your Nintendo 64 Memory Pak. You may then pit that boss against other opponents, exactly the same as you would any of the other wrestlers featured in *WCW vs. NWO: World Tour.*

WCW

There is a Starrcade title match for each of the Single, Tag Team, and Cruiserweight divisions—so get ready to rock!

Heavyweight Champion

Heavyweight Tag Champion

NWO

NWO's Souled Out cards are the hottest paper[22] in pro wrestling! You can be a part of the action with a Souled Out title match for the Single and Tag Team divisions.

DOA

The outlaws of pro wrestling refuse to be left in the dust. They're here to stay, and they're thirsty for juice[23]! There's a Final Blast title match for each of the Single, Tag Team, and Cruiserweight divisions.

Heavyweight Champion

Heavyweight Tag Champion

League

Possibly the purest form of pro wrestling, your individual league standing is determined by scoring three points per win, one point per draw, or zero points per loss in an up to 16-man (eight-team) round-robin tournament.

1 vs. 1 Single

2 vs. 2 Tag

Tournament

Taking the competition to a higher level, there's no "do over" for a green wrestler thrown out of this 16-man (eight-team) round-robin, single-elimination tournament.

1 vs. 1 Single

2 vs. 2 Tag

[23] blood

[24] A clean job is a loss without the use of prohibited moves.

Tips and Strategies

- Take advantage of a wrestler's weaknesses. Some wrestlers are more vulnerable to Punching and Kicking Attacks, while others are more vulnerable to Grapples.
- To determine if a wrestler is vulnerable to Attacks or Grapples, start each match by running to confront your opponent. Immediately unleash a string of Attacks. If your opponent throws out his chest to defy you, that wrestler is resistant to Attacks. Switch to Grapples immediately!
- Remember, though, you can pummel any wrestler, even those resistant to Attacks—*if* your Attacks are fast enough. Practice using the Ⓑ button—lay on a fast Attack, followed by strong Attack, followed by another fast Attack.
- Drain a wrestler's Spirit, even a wrestler with a flashing "Special," by striking him fast enough with Punching and Kicking Attacks. Use the shoulder buttons to avoid a Grapple!
- Combine attacks for maximum damage. Here's an example of how to use "combos":

1. Attack your opponent as fast as possible, without mercy, draining his Spirit.
2. Keep Attacking—back your opponent up against the ropes. Eventually, you'll knock him through the ropes onto the apron.
3. Wait for your opponent. When he stands up to climb back into the ring, grab him with a Grapple. Throw him back over the ropes into the ring.
4. Immediately move to his head or legs. Grab him in a Submission hold, draining more of his Spirit.
5. Wait for your opponent to stand. The second he gets on his feet, grab him in another Grapple. Throw him to the mat.
6. Immediately follow up with another Submission hold. Now he should be ready to pin!

This Is It—It's Time!

Get yourselves ready, wrestling fans: It's time to go to the dance!

WCW

WCW (World Championship Wrestling) has a long history, with its roots in the original National Wrestling Alliance of 1948. The NWA held "Starrcade '83," the first wrestling supercard seen by more than 15,000 fans, in November 1983. A year later, Ric Flair won pro wrestling's first one million dollar prize when guest referee Smokin' Joe Frazier halted "Starrcade II": Flair's opponent, Dusty Rhodes, was bleeding too much.

In April 1987, the NWA purchased the UWF. Several UWF wrestlers, including Sting, joined the NWA. In November 1988, entrepreneur and media magnate Ted Turner bought the NWA. Turner's TBS "Superstation" featured the NWA's "World Championship Wrestling" TV program every Saturday night for several years. In December 1990, the National Wrestling Alliance was officially renamed World Championship Wrestling. Internationally celebrated wrestler Hulk Hogan joined WCW in June 1994.

Interestingly, since October 1990 ("Halloween Havoc '90") there have been several wrestlers who have pretended to be Sting for one reason or another, including Kevin Nash and the current fake "Sting" (a.k.a. "Stink"), the wrestler who used to be Cobra.

LEX LUGER

Height: 6' 4"
Weight: 270 lbs.
Signature Move: Torture Rack

Profile

Lex Luger found wrestling stardom quickly after a standout gridiron career in the NFL, CFL, USFL, and with the University of Miami "Hurricanes." Luger cultivated this early fame using experienced, focused determination, and now stands unquestionably at the pinnacle of his career. Luger has been the backbone of WCW, combating NWO when other superstars scattered. Capable of "racking" the most behemoth opposition following a volley of devastating forearms, Luger has accumulated a distinguished record, including a WCW World Heavyweight championship, two WCW tag-team titles, and four WCW US belts.

Profile

Shrouded in mystery and controversy, Sting lurks at the fringe of WCW vs. NWO battle lines. Draped in black and wielding a baseball bat, Sting has created a dark, silent aura that intimidates everyone. His allegiance only to himself has everyone guessing his next move. This native of Venice Beach, California, has been the "franchise" superstar of WCW since the promotion started.

GIANT

Height: 7' 4"

Weight: 450 lbs.

Signature Moves: Choke Slam, Choke Hold

Profile

Destroying all in his path, the Giant has created tall tales, not fairy tales, with ferocious finality. Mammoth match-ending choke slams have gained awestruck attention for wrestling's "biggest" young superstar. The Giant, 25, grew quickly to become WCW's youngest world heavyweight champion by battling such renowned veterans as "Nature Boy" Ric Flair, Lex Luger, and "Macho Man" Randy Savage before surrendering the title to "Hollywood" Hulk Hogan. Recently adding to his growing accolades, the Giant prevailed at the three-ring, 60-man battle royal at *WCW World War 3* pay-per-view.

NWO

The wrestlers of NWO were once part of WCW, but they got tired of making a lot of money for other people. They decided to pursue their dream—to start a wrestling organization of their own, and vowed that one day soon they'd take over WCW wholly and utterly.

NWO (New World Order) was cofounded by pro wrestlers Kevin Nash and Scott Hall on July 7, 1996 when they, along with Hulk Hogan, took on Sting, Lex Luger, and Randy Savage in the "Bash at the Beach '96." When Hulk Hogan beat the Giant in "Hog Wild '96" that following August to win WCW World Title, Hogan used a can of spray paint to "rename" the belt "NWO World Heavyweight Title."

The wrestlers of NWO apply an "aggressive, take-charge approach" to everything they do. They train hard, work hard, and play hard, as well. Most of all, NWO wrestlers are proud to declare they're the "kind of guys who like to say 'we told you so.'"

KEVIN NASH

Height: 7' 1"

Weight: 367 lbs.

Signature Move: Jackknife Power Bomb

Profile

Seven-foot-one Kevin Nash is a towering measuring stick for wrestling's future. Partnered with NWO member Scott Hall as the champion tag team "The Outsiders," the two are bad-to-the-bone awesome. Nash has a "special" direct way of communicating—such as jackknifing WCW Executive VP Eric Bischoff through a table. The impact of such persuasion is amazing—Bischoff soon joined NWO. Action is one thing, but talk is something Nash works like a master. Equipped with a lightning wit and superior intelligence, Nash dishes out biting banter faster than McDonald's spews burgers. Finding humor in most things, except when he makes a joke of opponents, Nash is the soul of NWO.

MASTER FUJI

Height: 6' 3"

Weight: 227 lbs.

Signature Move: Mountain Splitter

Profile

If a single wrestler can represent everything the Independent Union is all about, it's Master Fuji. Caring little for material wealth, caring less for himself, and caring not at all for other people, Master Fuji's only true love is wrestling. This Japanese fighter has forgotten more about wrestling than most other wrestlers will ever know.

DIAMOND DALLAS PAGE (DDP)

Height: 6' 5"
Weight: 253 lbs.
Signature Move: Diamond Cutter

Profile

In recent WCW history, no one has risen to the top of the "Big Boys" faster than Diamond Dallas Page (DDP). Against the odds this color commentator-turned-manger-turned-wrestler has been a sponge for wrestling knowledge, rapidly improving with each match. His seemingly unstoppable "diamond cutter" finishing move has sliced opponents like glass. Impressive victories winning WCW TV Title and the Lord of the Ring competition have made both NWO and WCW opponents beware.

BLACK WIDOW

Height: 5' 9"
Weight: 194 lbs.
Signature Moves: Spinning Head Sickle, Death Coil

Profile

Heiress to a fabulous fortune and the only survivor of a horrible north sea yachting disaster that killed her family, little else is known about the mysterious and reserved Black Widow. Resistant to human interaction, Black Widow's only love now is money. Most professional wrestlers agree that the world would never see the forceful Black Widow appear in public were it not for the fact that every booker on the planet would pay any amount to coerce the Black Widow to appear on their cards. There isn't a pro wrestler on Earth that fancies a kiss from this spider woman!
